REIKNIADGERÐIR - TENINGAR OG TÖLUR

SAMLAGNING

Samlagning

— teningar og tölur

Verkefnapakinn samanstendur af

- óutfylltu samlagningarspjaldi
- 30 útfylltum samlagningar-spjöldum, meðal annars:
 - tölunum 1-20
 - tugunum 10-200
 - sléttum tölum 1-19
 - oddatölum 2-20
 - hundraðstölum 100-1000
 - tölum sem hlaupa á 5
 - óreglulegum dæmum
- kvittanablaði í lit og svarthvítu
- teningablaði í lit og svarthvítu
- talnablaði 0-10 í lit og svarthvítu
- verkefnablaði fyrir orðadæmi
- orðavegg með hugtökum sem tengjast samlagningu.

Markmið, að

- læra samlagningu í gegnum leik
- vinna með orðadæmi í samlagningu
- kynnast samlagningarhugtökum
- læra á teninga.

Undirbúningur

Prentaðu pakkann út, klippu teninga og tölustafi niður. Kvittanablaðið og skjalið fyrir orðadæmin eru ætluð til fjölföldunar.

Samlagningarspjöld

Hægt er að plasta þau og brúka sem fjölnota kennslugögn. Þá leysa nem-

endur verkefnin með glærupenna. Einnig er hægt að fjölfalda efnið og útbúa verkefnapakka sem nemendur vinna beint í.

Nemendur geta unnið verkefnin einir eða í hópum. Samlagningarspjöldin eru númeruð. Þegar nemandi hefur lokið spjaldi hakar hann í samsvarandi númer á kvittanablaðinu.

Ef nemendur útbúa samlagningarspjald og velja tölustafi til að vinna með er tilvalið að nota tening, spila-stokk, draga úr teningaspjöldunum eða miðunum með tölustöfunum.

Orðadæmi

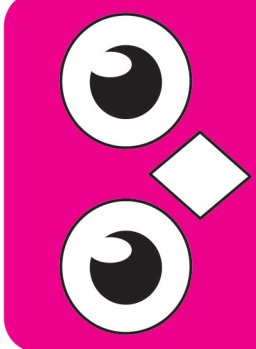

Á sama hátt og unnið er með samlagningarspjöldin má einnig styðjast við töluspjöldin og teningana til að semja orðadæmi.

Orðaveggur

Með samlagningarpakkanum fylgir orðaveggur með hugtökum sem tengjast reikniaðgerðinni. Klippið reitina út, plastið og hengið upp í kennslustofunni.

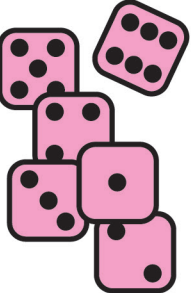

Sambærilegir gagnapakkar með frádrætti, deilingu og margföldun eru væntanlegir á kennarinn.is.
